

Bhavik Patel

.NET Full Stack Developer

9327199315 • pb3721700@gmail.com • GitHub: github.com/bhavikpatel025

PROFESSIONAL SUMMARY

Results-driven .NET Full Stack Developer with hands-on experience in ASP.NET Core Web API, Angular, SQL Server, and Azure. Proven ability to design and deliver scalable enterprise applications, RESTful APIs, and feature-rich e-commerce systems. Adept at clean architecture, JWT-based security, and modern frontend development using Angular 19.

EXPERIENCE

.NET Full Stack Developer | Ncoresoft Technology

Sep 2025 – Present

- Design and develop full-stack web applications using ASP.NET Core Web API (.NET 8) and Angular 19, following Clean Architecture and Repository Pattern principles; implement JWT-based authentication, role-based authorization, and Angular route guards to secure applications end-to-end.
- Build responsive Angular frontends with Angular Material, Bootstrap 5, and RxJS; integrate SignalR for real-time features including live notifications and viewer counts.
- Optimize SQL Server performance through EF Core migrations, efficient CRUD operations, and query tuning; use Git, Postman, and Swagger across all projects.
- Architected an AI-powered Electronic Medical Record (EMR) system, integrating Groq Vision AI and Tesseract OCR to automatically extract medical data and generate adaptive clinical summaries.

.NET Developer Intern | Atharva IT Services Pvt. Ltd, Ahmedabad

Mar 2025 – Aug 2025

- Developed a web-based Student Management System using ASP.NET Core MVC and Web API with server-side searching, sorting, filtering, and CRUD operations using SQL Server.
- Integrated jQuery and AJAX for seamless UI interactions; enhanced responsiveness using Bootstrap 5.

PROJECTS

E-Commerce Platform

.NET 8 · Angular 19 · SQL Server · JWT · EF Core · Bootstrap 5

- Built a full-stack e-commerce platform with product listing, cart management, order processing, product rating, and paginated/filtered browsing (search, category, price range, stock filters); developed an Admin Panel for product CRUD with image upload (JPG/PNG/WEBP, max 5MB), URL-based image input, and category management via reactive Angular forms.
- Implemented JWT authentication, role-based routing (Admin/Customer), Angular HTTP Interceptors for auto-attaching Bearer tokens, and lazy-loaded route guards for protected navigation.
- Architected backend with Clean Architecture — Controllers, Services, Repositories, DTOs, AutoMapper, and EF Core with SQL Server; included database seeding, soft-delete, and order/cart/rating management APIs.

Smart EMR System (AI-Powered)

.NET 8 · Angular 19 · SQL Server · Groq AI (Llama 3) · OCR · Cloudinary · Whisper AI

- Engineered a full-stack EMR application streamlining doctor-patient management, interactive appointment scheduling, and secure document archival, with Cloudinary-integrated cloud storage for secure, scalable storage and fast retrieval of patient records and scan reports.
- Integrated Groq Vision AI and Tesseract OCR to automatically extract critical data (medications, diagnoses, labs) from uploaded prescriptions and scan reports.
- Implemented an AI-driven synthesis engine to generate real-time, categorized clinical snapshots and bullet-point summaries for physicians, plus Whisper AI-based voice-to-text dictation enabling doctors to record clinical notes via microphone for instant transcription.
- Built a multilingual PDF prescription feature that translates digital prescriptions into regional languages (Hindi, Gujarati) and generates downloadable PDFs for patients.

EDUCATION

Master of Computer Application (MCA) — L J University, Ahmedabad

Aug 2023 – May 2025 | SPI: 7.0

Bachelor of Computer Applications (BCA) — BDKM College, Palanpur

Aug 2020 – May 2023 | CGPA: 6.61

Higher Secondary Certificate (HSC) — Matrushree J R Vidhyalay, Palanpur

2020 | 71.85%

TECHNICAL SKILLS

- Languages & DB:** C#, LINQ, SQL, TypeScript | SQL Server, Entity Framework Core
- Backend:** ASP.NET Core MVC, ASP.NET Core Web API, SignalR, JWT, AutoMapper
- Frontend:** Angular 19, Angular Material, Bootstrap 5, RxJS, jQuery, AJAX, HTML/CSS
- Tools:** Git, Postman, Swagger

CERTIFICATIONS

- Coursera: Software Testing
